Case Reports in Cardiovascular Toxicology: Cardiovascular Journal

Case Reports and Case Series in Cardiology Journal is peer-reviewed scholarly publication that addresses the molecular causes of cardiovascular disease. Committed to disseminating up-to-date information, reviews, and clinical and experimental data on the molecular treatment of cardiovascular disease. The harmful effects of novel cardiovascular medications, the cardiovascular consequences of non-cardiovascular medications, gene therapy, and anti-cancer treatment are also discussed. Cardiovascular Toxicology also provides toxicological and safety information on newly developed cardiovascular and non-cardiovascular medications. Toxicity to heart can be due to intake of heavy metals, eating disorder such as anorexia nervosa or incorrect administration of drugs. Cardiovascular Toxicology leads to weakening of heart and leads to delay in circulation. Cardiovascular toxicology deals with the adverse effects on the center or blood systems which result from exposure to toxic chemicals. It describes safety data of damaging effect of recent cardiovascular drugs.

Manuscript Submission

Authors are requested to submit their manuscript by using Online Manuscript Submission Portal: https://www.casereportsincardiology.org/submit.html (or) also invited to submit through the Journal E-mail Id: editor@casereportsincardiology.org.
